

# Contents

Opening Speech of the President of OSTIV, Mr. L. A. de Lange  
OSTIV Plaque with Klemperer Award for Eugen Hänle  
OSTIV Diplomas for Dr. Ing. Wiesław Stafiej and Dipl.-Met. Carsten Lindemann

## Technics and Training

- A Simplified Dynamic Speed Calculation Method for Flutter-Type Accident Investigation  
Sailplane Loads in Aero-Tow under Turbulent Conditions  
The Investigation of the Possibility of Increasing the L/D Ratio of Record Sailplanes with the Help of a Sailplane Model  
Main Static Aeroelastic Effects on Sailplane Longitudinal Stability and Control  
The Longitudinal Dynamic Behaviour of Sailplanes as Affected by Mass Balancing of the Control System  
Theoretical Analysis of the Dynamic Lateral Stability of a Paraglider
- Comparative Static and Fatigue Tests of Laminate-to-Aluminum-Alloy Adhesive Joints
- Alleviating Capabilities of the Sailplane Structure  
Neue Modellaufwindverteilungen und ihr Einfluss auf die Auslegung von Segelflugzeugen  
What Span for an Open Class Sailplane?  
A Retractable Propeller for Self Launching Sailplanes
- Über die Höhenfehler der Sollfahrt-Systeme  
Some Computer Calculations on the Optimum Waterballast of Sailplanes  
Dynamic Soaring in the Atmospheric Boundary Layer – an Experimental Investigation: with an Appendix on Wind Shear  
The Influence of Sailplane Performance and Thermal Strength on Optimal Dolphin-Flight  
Transition Piloting Techniques  
A Direct Technique for Measuring Sailplane Performances
- Flight Test Polar Measurements of Modern Sailplanes  
Entwicklung eines elektronischen Variosystems mit Drucksonden  
Grundlagen und Anwendung der Sollfahrt im Segelflug  
Fahrtvariation zur Optimierung der Steiggeschwindigkeit  
Instructional Techniques for Gliding Instructors
- A New Seatbelt System for Sailplanes  
Service Life Extension Possibilities by Fatigue Tests on Used Gliders
- The Aerodynamic Design of Sailplane Tail Assemblies  
The Deep Stall of Sailplanes  
Development of a Computerized Sailplane Performance Analysis  
Configuration Optimization of a 13-Meter-Span Sport Sailplane  
Experimental and Theoretical Investigation of Differences between a Manufactured and the Corresponding Design Airfoil Section  
Advances in Material Science and Fabricating Techniques for Sailplane Construction  
Some Notes on Soaring Flight Optimization Theory  
Computed Variometer Response to Elevator Motion and Thermals  
Glide Matrix and Final Glide Device  
A Simple Total Energy Sensor
- J. Gedeon  
J. Sandauer
- V.D. Belyj  
P. Morelli and P. Nuccio
- P. Duranti  
J. Klimkowski and  
W. Lucjanek  
B. Jancelewicz and  
T. Dzwonowski  
W. Stafiej  
K.-H. Horstmann  
G. Waibel  
D.J. Marsden and  
V.K. Sharma  
I. Westerboer  
H. Pirker
- V.V. Utgoff
- J. Gedeon  
V. Giavotto and  
L. Salvioni  
R.H. Johnson  
C. Meisser  
I. Westerboer  
H. Reichmann  
C.A. Patching and  
G. Strickland  
W. Lücker  
J. Gedeon and  
G. Kálmán  
E.E. Larrabee  
H. Millicer  
P.K. Squires  
P.K. Squires
- D.M. Somers  
R.T. Lamson  
R. Arho  
M.J. Abzug  
P. Mortenson  
O.W. Nicks

## Meteorology

- Some Characteristics of Thermal Convection as Measured by a Powered Sailplane  
Thermals in the Sub-Cloud Layer of the Atmosphere  
Stereo Measurement of Thundercloud Kinematics  
Some Characteristics of the Convective Layer  
The Characteristics and Soaring Potential of Long Lee Waves in Southern Alberta  
A Guide to Assessing the Characteristics of Dry Thermals under Various Meteorological Conditions  
The Soaring Climatology: A Meteorological Aid to Pilots and Forecasters
- C. Lindemann  
D.A. Kononov  
J.H. Reuss  
Andrée Estival  
P.F. Lester
- M.J. Hancy  
P.F. Lester

Special Subjects

Wetter und Stress im Hochleistungs-Segelflug  
The Problem of Optimal Starting Time on Soaring Competitions, Taking into Account the Meteorological Conditions

G. Stedtfeld

M.E. Reinhardt,  
P.A. Caldwell and  
W. Schulte  
I. Bánó

Untersuchung der Kremer Ausschreibung  
Energy Exchange Between a Sailplane and Moving Air Masses under Nonstationary Flight Conditions with Respect to Dolphin Flight and Dynamic Soaring

W. Gorisch

Technics and Training

J. Gebson  
J. Sandauer

A Simplified Dynamic Speed Calculation Method for Flutter-Type Accident Investigation  
Sailplane Loads in Aero-Tow under Turbulent Conditions  
The Investigation of the Possibility of Increasing the L/D Ratio of Record Sailplanes

V.D. Belyj  
P. Morilli and P. Nuccio

with the Help of a Sailplane Model  
Main Static Aeroelastic Effects on Sailplane Longitudinal Stability and Control  
The Longitudinal Dynamic Behaviour of Sailplanes as Affected by Mass Balancing at the Control System

P. Duranti  
J. Klimkowski and  
W. Lucjanski

Theoretical Analysis of the Dynamic Lateral Stability of a Paraglider

B. Janeczko and  
T. Dzwonowski

Comparative Static and Fatigue Tests of Laminate-to-Aluminum-Alloy Adhesive Joints

W. Staffel  
K.-H. Hörstmann  
G. Waidel

Alleviating Capabilities of the Sailplane Structure  
Neue Modellbauverfahren und ihr Einfluss auf die Auslegung von Segelflugzeugen  
What Span for an Open Class Sailplane?

D.J. Marsh and  
V.K. Sharma

A Rotatable Propeller for Self-Launching Sailplanes

I. Westerber  
H. Pirker

Über die Höhenröhre der Segelfahrt-Systeme  
Some Computer Calculations on the Optimum Waterballast of Sailplanes

V.V. Ugoff

Dynamic Soaring in the Atmospheric Boundary Layer - an Experimental Investigation  
with an Appendix on Wind Shear

J. Gebson  
V. Glavito and  
L. Saviotti

The Influence of Sailplane Performance and Thermal Strength on Optimal Dolphin-Flight  
Transition Profiling Techniques  
A Direct Technique for Measuring Sailplane Performances

R.H. Johnson  
C. Meiser  
I. Westerber

Right Test Point Measurements of Modern Sailplanes  
Entwicklung eines elektronischen Velosystems mit Drucksonden

H. Reichmann  
C.A. Patching and  
G. Strickland

Grundlagen und Anwendung der Segelfahrt im Segelflug  
Fahrverhalten zur Optimierung der Steiggeschwindigkeit

W. Lückert  
J. Gebson and  
G. Kämann

Instructional Techniques for Gliding Instructors  
A New Seabird System for Sailplanes  
Service Life Extension Possibilities by Fatigue Tests on Used Gliders

E.E. Leirhaas  
H. Millner  
P.K. Spures

The Aerodynamic Design of Sailplane Tail Assemblies  
The Deep Stall of Sailplanes  
Development of a Computerized Sailplane Performance Analysis

D.M. Somers  
R.T. Lamson  
R. Arto

Configuration Optimization of a 13-Meter-Span Sport Sailplane  
Experimental and Theoretical Investigation of Differences between a Manufactured and the  
Corresponding Design Airfoil Section

M.J. Adzig  
P. Morhanson  
O.W. Nicks

Advances in Material Science and Fabricating Techniques for Sailplane Construction  
Some Notes on Soaring Flight Optimization Theory  
Computed Variometer Response to Elevator Motion and Thermal

P.K. Spures

Glide Matrix and Final Glide Device  
A Simple Total Energy Sensor

Meteorology

C. Lindemann  
D.A. Konovtsov  
J.H. Reuss

Some Characteristics of Thermal Convection as Measured by a Powered Sailplane  
Thermals in the Sub-Cloud Layer of the Atmosphere  
Stereo Measurement of Thundercloud Kinematics

Andr e Estival  
P.F. Lester

Some Characteristics of the Convective Layer  
The Characteristics and Soaring Potential of Long Lee Waves in Southern Alberta

M.J. Hancy  
P.F. Lester

A Guide to Assessing the Characteristics of Dry Thermals under Various Meteorological
