XVII. OSTIV-Congress 1981 at Paderborn

	Page
Introduction	3
Addresses by	
Georg Brütting, President of the "Deutscher Aero Club"	3
Bill Ivans, President of the "Commission Internationale du Vol à Voile (CIVV)"	3
Fred Weinholtz, Director of the World Gliding Championship 1981, Paderborn	3
Key note Address by	
Prof. Dr. Fred Thomas, Head of the Research Department for Flight Mechanics, Guidance and Control of German Aerospace Research Establishment (DFVLR) at Braunschweig, Prof. Dr. Fred Thomas	
<i>"Aspects of future development in sailplane design".</i>	3
Awards presented at the XVII. OSTIV-Congress	
OSTIV-Plaque 1981 with Klemperer Award for Dr. Paul MacCready, USA	5
OSTIV-Prize 1981 for Akademische Fliegergruppe Braunschweig	5
OSTIV-Diplomas for Technical and Scientific Papers 1981 for Frank C. Irving and Dr. Joerg M. Hacker	6
Special Reference for Technical Paper of L. M. M. Boermans and H. J. W. Selen	7
Dr. Joachim P. Kuettner, New Honorary Member of OSTIV	7
Prof. C. E. Wallington, New Chairman of the Scientific Section	8
Papers	
Technics	
<i>Aerodynamics</i>	
Das gedämpfte Höhenleitwerk im Kreisflug	G. Stich 9
Profilwiderstand - Verringerung durch Ausblasen	K. H. Horstmann & A. Quast 15
On the design of some airfoils for sailplane application	L. M. M. Boermans & H. J. W. Selen 18
Shapes for the tips of lightly-loaded propeller blades	F. Irving 40
Propeller design and analysis for pedal driven and other odd aircraft	E. E. Larrabee & S. French 42
Drag measurements on airfoils	D. Althaus 59
Influencing transition on airfoils	D. Althaus 62
<i>Design & Development</i>	
Type certification test results utilized to improve the design concept	W. Stafiej 74
Two-seater glider flight test evaluation	C. A. Patching 78
Primary two-seater development problems	J. Gedeon 89
The design and development of the Sprite Sailplane 1969-1980	J. C. Riddell 102
Progress in home-built sailplanes	G. Sunderland 105
Some ideas about gliders with variable geometry concerning performance and handling qualities (D-40 of Akaflieg Darmstadt)	K. J. Heer 113
Die Ermittlung von Lastkollektiven für die Bemessung von Segelflugzeugen	H. Kossira & W. Reinke 116

<i>Flight Measurements & Instrumentation</i>		
Zweck und Funktion des Lastkollektivsammlers	B. Brunner	121
A Proposal for a New Variometer System	H. Pirker	124
<i>Structures</i>		
Sailplane wing box design by use of Graphite/Aramide/Epoxy material	G. Romeo	137
Fatigue test of a sailplane wing in CFRP construction	C. Kenske	140
<i>Operations & Safety</i>		
The design and development of glider launching winches	J.C. Riddell	154
A pilot restraint system for sailplanes	G. Sunderland	162
Evaluation of sailplane accidents	Zborolski	166
<i>Flight Techniques</i>		
Basic dolphin tactics	W. Mozdyniewicz	174
The "Convex-Combination Approach" - a Geometric Approach to the Optimazation of Sailplane Trajectories	J.L. de Jong	182
The optimum center of gravity position for minimum overall enery loss	F. Irving	202
A simple model of dynamic energy exchange between a sailplane and vertical air currents	J. Sandauer	208
Optimal dolphin-style soaring	E.D. Dickmanns	210
Load variation flight style and its implications to the theory of soaring	W. Gorisch	213
Meteorology		
<i>Boundary Layer Flow over Complex Mountainous Terrain</i>		
Airflow characteristics in vicinity of an obstructing mountain ridge in complex terrain	G.L. Wooldridge	220
Temperatur- und Feuchtestruktur der freien Atmosphäre und ihr Tagesgang über einem einseitig geschlossenen Hochgebirgstal aus Motorseglermessungen während DISKUS	M.E. Reinhardt & H. Willeke	225
Preliminary results of the Alpine Experiment DISKUS	J. Hacker	228
<i>Foehn and Lee Waves</i>		
Fallstudie eines Süd- und eines Nordföhns über den Alpen	R. Steinacker	234
Observations of waves in a wide range of conditions	T.A.M. Bradbury	238
Waves, billows, and wakes, as revealed by satellite	R.S. Scorer	243
<i>Modelling Orographic Flow</i>		
Three-dimensional numerical simulations of airflow over a heated mountain	T.L. Clark	247
Modelling anabatic flow	P.C. Manins	252
<i>Thermal Convection and Thermal Waves</i>		
Parameters of Thermal Convection as Measured by a Powered Glider	C. Lindemann	255
Thermal Characteristics of different Types of Soil	C. Lindemann	259
Notes on cloud streets as seen by satellite	R.S. Scorer	265
An extensive wave system above a convective layer	J.M. Frith	269
The effects of thermals and wind on the distribution of atmospheric pollution	S.L. Capdevilla & M.S. Tiraboschi	271
<i>Task Setting</i>		
Vereinfachtes Schema zur Optimierung von Tagesaufgaben bei Segelflugwettbewerben	M Kreipl & H. Degner	275
Special Subjects		
<i>Medical Aspects</i>		
Beta-receptor-blocking and fitness for flying, especially for glider-pilots in competition	J. Marpmann	279
Glider pilot workload: Cardiopulmonary regulation and energy expenditure	J. Beier & D. Jeschke	281
