XVIII. OSTIV-Congress 1983 at Hobbs, New Mexico, USA

Page

Introduction

3

Awards presented at the XVIII. OSTIV-Congress

OSTIV-Plaque 1983 with Klemperer Award for R. H. (Dick) Johnson, USA

3

OSTIV-Diplomas for Technical and Scientific Papers 1983 for

Dipl. Ing. L. M. M. Boermanns and Terry Clark

4

Key note Address by

Dr. Joachim Kuettner, National Center of Atmospheric Research (NCAR),
Boulder, USA

"50 years Wave Soaring-Adventure, Research and Challenge" (with film)

5

Papers

Technics

Aerodynamics

Wind tunnel tests of eight wing-fuselage combinations

L. M. M. Boermanns & D. C. Terleth 10

Wind tunnel tests on an outer wing segment of the ASW-19X sailplane

L. M. M. Boermanns &

B. O. Olbekkink 26

Design and development

Outline of a method for the automated manufacture of laminar wings

D. Charoudi 38

Aerodynamic design of winglets for a standard-class glider

U. Dressler 42

Some new developments in atmospheric turbulence and terrain surface description

J. Gedeon 51

How to realize high performances by powered flight as well as by gliding shown by
the "D-39b" of Akaflieg Darmstadt

K.-J. Heer 58

Some ideas for optimum flap-aileron system concerning handling qualities as well
as flight performance

K.-J. Heer 60

A critique of two recent sailplane design contests

J. McMasters 62

An alternate approach to cost effective soaring

D. Reece 81

Experimental results of advanced composite sailplane structures

G. Romeo 84

Flight measurements and instrumentation

A pilot's wing profile drag monitor system

R. H. Johnson 87

A thermalling turn indicator

C. D. Norman 89

Sailplane performance flight testing

D. J. Marsden 93

Loads and Flight Techniques

Wing loading spectrum of glider in aerobatics measured on training two-seater
"SZD-9" to "Bocian"

W. Stafiej 103

Computer-aided research of different ways of leaving a thermal

B. Stojkovic 106

Projects

Progress report from the Flight Research Institute 1983

J. McMasters 115

Meteorology

Page

Boundary layer flow

- Numerical simulations of a severe downslope windstorm in three spatial dimensions: Eddy-kinetic-energy budget analysis
Some results of powered glider flights during PUKK
A wintertime convergence zone investigated with a sailplane
Meteorological navigation of Alpine long-distance soaring flights

T.L. Clark 129
J.M. Hacker 135
E. E. Hindman & G.S. Young 142
H. Leykauf 148

ALPEX

- Preliminary results of an extraordinary mountain wave event over the Pyrenees during ALPEX

Th. A. Hafner 154

Thermal convection

- Transfer of sensible heat from the ground and development of the convective layer
Potential exploration and use of miniscale lift pattern

D.J. Portman 163
C.E. Wallington 167

Forecasting

- A thermal activity forecasting scheme suitable for personal computers
Mesoscale measurements for gliding forecast in an Alpine valley

D.S. Heimann 173
B. Neininger & O. Liechti 175

Special Subjects

Medical aspects

- Effect of multi-hour glider flight on energy metabolism and body fluid balance
A sportsmedical survey during the Dutch National 15 m - Class Championship

J. Beier & K. Gerecht &
H. Schlebusch 180
L. Leenen 182

Task setting

- Let's try a flexirace

C. E. Wallington 186
